Vellore Institute of Technology
(Deemed to be University under section 3 of UGC Act, 1956)

School of Computer Science and Engineering

Fall 2026-2027

Class ID: VL2026270102001 **Slot:** F1+TF1

Course code / Name: BCSE328L Cryptocurrency Technologies

Problem Statement

Formulate a unified architectural model, protocol, or framework that mitigates at least two overlapping limitations across these four emerging technology domains. Your team must propose a viable technical solution leveraging current technological trends (e.g., Post-Quantum Cryptography, Zero-Knowledge Proofs, Decentralized AI, Quantum Machine Learning, or Hybrid Consensus Mechanisms) and present the complete findings in an **IEEE Conference Template format.**

Requirements:

- Limitations and contributions based on team size
- **Results and Discussions**: Quantitative/qualitative analysis, trade-off comparisons, realistic acknowledgment of deployment bottlenecks, and validation.

Submission Guidelines

- **Team Size:** Maximum of 3 students per group.
- **Format:** IEEE 2-Column Conference Paper Template (Word or LaTeX).
- Max 12 pages
- **Integrity Constraints:**
  - **Plagiarism:** Must be $\leq$ **10%** (Turnitin).
  - **AI-Generated Content:** Must be $\leq$ **20%**.

Evaluation Scheme (Total: 10 Marks)

Evaluation Criteria	Weightage
Novelty & Technical Implementation	6 Marks
Demo	2 Marks
IEEE Report Format & Integrity Constraints	2 Marks

Important Dates

- Demo: 9/Oct/2026
- Report: 21/Oct/2026
